Ilia Poliakov | IT Project Manager

LinkedIn | Portugal, Lisbon

Summary

A unique person who combines both excellent management skills with technical knowledge (can code myself) and a higher education background in mathematics. Certified Project Management Professional (PMP) with over 15 years of experience managing 50+ projects, including four years as a PMO Director. Proven business solution architect, pre-sales, technical program manager, driving process efficiency, KPI automation and AI-readiness across organizations. Additionally, I am an expert in delivering Business Analytics, Big Data, Data, Data Warehouse, AI (already have implemented one big project and led programs of ai transformation initiatives in several companies).

I began my career as a developer/business analyst (2007), then promoted to architect, Project Manager (2010), and eventually PMO Director (2016). Member of the Project Management Institute PMI since 2014. This progression ensures I understand the needs of all team members and stakeholders, incl. C-level. Having active development skills allows me to stay closely aligned with development teams while providing stakeholders with accurate, data-driven project insights. I am proficient in SQL, NoSQL, Node.JS, JavaScript, Visual Basic, Power Query, Power BI and SAS. I bring extensive experience in configuring, customizing workflows, and even developing extensions, plugins, and reports for Jira, ServiceNow, MS Project, RACI matrices, Spira, Smartsheet and YouTrack across 10+ organizations (management tools should meet teams' needs and company goals, not vice versa).

My approach combines social skills, business acumen, math, and IT expertise to build effective teams and deliver results. Fluent in English, Portuguese (A2), Russian. Relocated to Portugal in 2023.

Experience

Senior Technical Project Manager / Founder

SClaude - AI Process Orchestration & Automation Tool August 2026 – Current

An open-source tool for orchestrating AI-driven workflows and automating software development processes.

- Designed and developed an AI-powered orchestrator for automating complex workflows and coordinating AI-driven software development processes.
- Implemented reusable workflow orchestration, task automation and AI-assisted development processes.

Technologies: *Claude Code (Anthropic), Agentic AI, Python, Bash, AI Agents, Workflow Automation, Agentic AI.*

Senior Project Manager

Edetek company August 2019 – January 2026

USA-based pharmaceutical company, healthcare SaaS product CTMS (Clinical Trial Management System), EST hours

- Significantly expanded product functionality across all managed projects, ex: **AI-powered RAG-based analytical (AWS BedRock LLM)** chat for data-driven answers about a drug trial. Originally it was an application just to control data quality issues from EDC, LIMS during a drugs trial process, now it is a very powerful tool for data analysis, analytics, visualization and alerts, that increased user engagement with Information Quality by up to 10x. ETL and CRF data warehouse projects were migrated to a new engine and database increasing performance 20x and enabling vector data storage.
- Managed 3 projects simultaneously (Scrum + Waterfall) and helped them raise team maturity levels, fostering self-coordination and autonomous issue resolution. Cross-team coordination, dependency and release management, ensuring that work delivered by multiple teams remains aligned, predictable, and transparent.
- Automated SDLC workflows, CI/CD, including status updates and reporting processes, resulting in improved project tracking accuracy and reduced manual workload and increased team satisfaction. Automated compliance (FDA, EMA, HIPAA, GxP, GDPR, 21 CFR Part 11) automated paperwork and by that the company reduced Time to Market from 3 to 0.5 months.
- Developed comprehensive KPI and reporting systems using my own coding expertise, establishing the foundation for the company's AI-readiness and data-driven management approach. Implemented more than 30 metrics and more than 20 reports including team progress, Gantt-charts, project status, product quality and even compliance.

- Redesigned planning procedures, integrating SDLC tools with MS Project, Smartsheets, and PowerBI for seamless cross-platform synchronization and enhanced portfolio visibility. This increased planning accuracy 5 times and reduced management distraction by 20%.
- **Led an AI-lab.** Implemented AI and Agentic-ai proof-of-concepts (AI-powered incident prioritization; AI-driven autoscaling that analyzes AWS logs to decide when to scale out or scale in our infrastructure; AI-based test coverage assessment and change-impact analysis; ai-based quality control on processes), MVPs with Claude Code including demonstrating how AI can automatically generate code from specifications, reducing developer effort and accelerating delivery, and integrating this capability into business processes.

Technologies: Amazon Web Services (AWS), Node.JS, JS, Angular, Java, Elasticsearch, Amazon Bedrock (LLM/MCP Server for RAG), RAG (*Retrieval-Augmented Generation) and AI (Claude Code from Anthropic) as a dev-team (Generative AI development), Spira (management and customization), PowerBI.*

Scrum Master

PointPay — January 2019 – October 2019

Blockchain-based banking, crypto currency DeFi exchange

- Oversaw the development of a comprehensive blockchain ecosystem, including Backend, blockchain infrastructure, Web, iOS, and Android components, resulting in a seamless integration across teams and company goals.

Technologies: Android (Java/Kotlin), TON, iOS (Swift/Objective-C), Solidity, Rust, React Native, React, Jira, Confluence.

Program Manager

Siberian.pro — January 2019 – August 2019

Marketing App for global retail brand, Ticketing App for trip aggregator company

- Successfully completed two fixed-price projects involving iOS and Android development for external clients.
- For one of these projects, in addition to managing the work, I implemented Jira workflows and reporting processes.
- Within my company, I set up processes in YouTrack, served as an advisor to the company owner, and developed key performance indicators (KPIs).

Technologies: Android (Java/Kotlin), iOS (Swift/Objective-C), React Native, Firebase, Google Analytics for Mobile, Tableau, Jira, Confluence, YouTrack.

PMO Director (Head of Project Management Office)

Alvion Europe — February 2016 – May 2019

Custom software development firm

- More than 50 projects finished as a Project Director
- More than 10 big projects finished as a Project Manager
- More than 50 presales participated (as a project manager/sales manager/architect), about 15 converted into contracts.
- Led a team of over five project managers within the Project Management Office (PMO).

Technologies: Java, PHP, C++, .Net, Angular, React, PostgreSQL, IoT, Android, iOS.

Project Manager

StinsComan — May 2015 – February 2016

- Managed 2 large-scale airport security projects
- Led 3 presales (as a project manager)

Technologies: NiceVision, Nice Situator, web-development

Technical Project Manager/Project Manager

IBS Company — April 2011 – April 2015

- 4 Big projects successfully delivered
- 30 Presales converted into client-ready proposals
- Responsible for BigData and BI-projects, face recognition
- Delivered 3 presentations at industry conferences: «SAP Forum», 2012; «Effective company management: attention to details», 2012; «5th International PLUS-Forum», 2014 (video)
- Published three articles for leading IT publications. Articles in journals: RBC (CNews) «Japan will use BigData for emergency"; interview for Plusworld and article «BigData's role in analytical models for credit scoring and anti-fraud»; article at Slon.ru "BigData for Finance».

Technologies: SAP Hana, SAP Web Analytics, SAP BusinessObjects Dashboards, SAP Analytics Cloud (SAC), SAS, Teradata, Netezza, IBM, Oracle Exadata, Informatica, IBM, i2, Cognitec Systems FaceVACS

Architect
Luxoft
Bank — January 2010 – March 2011

Technical Lead
Business & Decision
Telecommunications, banks — April 2008 – January 2010

Developer/Business analyst consultant
SAS Institute – Statistical Analysis System (SAS) — October 2007 – April 2008

Education
Bachelor's degree, M.V. Lomonosov State University, 2007

Skills

Soft skills

- Project management (PMBOK, Scrum, Agile, Waterfall, Hybrid, LeSS, SAFe, ITIL, Lean, Six Sigma, Kaizen, DORA) - delivered 50+ projects successfully.
- Project department setup and leadership, managing teams of 5+ Project Managers.
- Pre-sales and sales expertise, supporting 100+ project bids and conversions. Public Speaking & Publications.
- Strong stakeholder engagement with suppliers, subcontractors, and customers.
- Business domains: Custom Software Development, Financial Services (including fiat, blockchain and DeFi), Banking, Healthcare, and Public Sector.
- Solution architecture and implementation, ensuring effective methodologies aligned with business goals.

Technology skills

- SDLC tools: expert in configuration, customization, plugin development, and automation for MS Project, ServiceNow, Notion, Miro, ClickUp, Jira, Spira, YouTrack, Smartsheet and other instruments for project plans, timelines, budgets, and resource allocation. Experienced with structured forecasting techniques (velocity tracking, Monte Carlo simulation, historical trend analysis, EVM).
- Programming and platforms: Amazon Web Services (AWS), Java, JavaScript, Angular, Node.js, .Net, Python, SQL, AI (Claude Code, Amazon Bedrock, RAG implementations), VBA, iOS, Android.
- Analytics and BI platforms: SAS, SAP Dashboards, IBM Cognos, Power BI, Machine Learning solutions.
- Integration (ETL) platforms: Informatica, SAS.
- Data Warehouse & Big Data: Teradata, IBM Netezza, SAP Hana, SAP BW, Amazon Aurora, Amazon Redshift, Amazon RDS (MySQL, PostgreSQL).

Certification

- Project Management Professional certificate (PMP)®
- Project Management Expert certificate (PME)®
- Agile certificates: Scrum Open certificate, Product Owner Open certificate, Scrum Developer Open certificate
- Claude: Claude Code 101, Claude Code in Action, Claude 101
